## WE'VE HELPED INVESTORS REACH THEIR FINANCIAL GOALS

---

This document is a comprehensive overview of the origin, purpose, journey, and destination of TRADE HUB SOLUTIONS. The paper provides information to anyone looking to become a partner or investor with TRADE HUB SOLUTIONS, such that they understand the values and integrity held by the investment company.

The origin of this company is simply illustrated with the need to solve the problems most investors (and investment companies) faced at the time of inception. The purpose is thus rooted in the origin, and is explicitly introduced in the company's Vision and Mission statements found in this document and on the company's website. The journey has been highly progressive so far, with happy and satisfied clients. Even when the odds stood against us, our insurance policies ensured that our investors didn't have to suffer unnecessary losses. Our destination is that point where everyone who joins our clientele becomes convinced that we are that friendly, accessible, and result-oriented company that keeps to its word.

This whitepaper is updated as we make significant strides as a company, and thus may require you to also speak with our customer care unit, marketers, or any authorized agent, partner or member of the company.

We look forward to having you onboard.

## ABOUT US

TRADE HUB SOLUTIONS was founded in 2013 with the goal of overhauling global capital markets infrastructure. That vision has become a reality through intensive technology development and deep collaboration with the world's leading financial institutions.

## HOW TO EARN WITH US

The model is simple: using human and mathematical models, we spot trade opportunities on commodities such as gold, diamond, natural gas and so many others, as well as cryptocurrencies. Then the investments made by clients is distributed by quota into these assets, using artificial intelligence. The profit generated is distributed to investors with a valid investment plan, and according to the investment package enrolled in. Trade calls are backed by other stakes to bet the market flotation in order to avoid loss to the clients as minimum as possible, where this returns are been done 5 times in a week.

About Our  
**COMPANY**

## PROFIT GENERATING PRINCIPLES

We use a kind of margin known as **PAMM** (percent allocation management module) which makes sure this profits are always allocated. If any losses occur, it is managed by the company not its investor (thanks to our internal investment insurance policy). This means the investors always get their allocated profit. This is an apt example of a win-win approach for all clients.

Investors are meant to select a package where this generated profits are distributed based on what is invested (higher investment plans attract higher returns on investment), withdrawals are made weekly or monthly , and are paid out in cryptocurrencies (bitcoin).

About Our  
**COMPANY**

## PORTFOLIO ASSETS DISTRIBUTION

Identifying meaningful investment opportunities in the financial market is getting more challenging. Most investors go through a series of advise and still miss out on the ideal assets distribution for a profitable portfolio. So, we took the guess work out of the way and put the work on our shoulders. We designed a portfolio structure that makes the investment both secure and profitable at the same time.

We identify and analyze emerging trends in the markets. Then we put together the market dynamics, regulations and strategies that are constantly impacting the markets, in order to obtain optimum output. Considering all these, we design investment classes to adapt to client's goals at the point of entry. That's why each investor feels like the only one we have. We make it all bout the investor.

# Our Portfolio OVERVIEW

## BENEFITS OF INVESTING WITH US

The benefits of trading with TRADE HUB SOLUTIONS include:

- Complete transparency of all transactions.
- Each trader is in control of his trading account.
- All transactions on our website are monitored and regulated by law.

TRADE HUB SOLUTIONS'S leading traders have been involved in its development. It is designed to meet modern security and trading requirements; Individual service for each client. In addition to our tools, we also ensure that our customer service is of the highest level. Whatever request that you as an investor may make, we will make every effort to ensure that it will be handled in a timely and professional manner.

Investor  
**BENEFITS**

## SERVICES:

Trade Hub Solutions is a leading investment provider to financial market professionals. Our technical strategies cover equity, Forex, commodities and fixed-income markets. Our market depth and knowledge are attributed to our acquired experience on trading floors of many banking institutions.

**OUR EARNINGS:** Since inception our platform has generated a total sum of one billion, five hundred and eighty million, three hundred and seventy-five thousand, two hundred and thirty dollars (\$1,580,375,230) equivalent to (199,815.812 BTC) in profits alone since inception through our wide range of earning options, with three hundred and sixty-nine thousand investment accounts (369,000) and an active daily transaction of over two hundred and forty-three thousand dollars (\$243,000+) we have been able to satisfy every single investor we have ever worked with across the one hundred and twenty-seven (127) countries we currently support. Investors can grow their investment and earn profits in our platform in the following ways:

1. By purchasing an investment plan.
2. By direct commission on their referrals.
3. By participating in our representative program.
4. Through our shares.
5. By participating in our affiliate marketing program.

Investor  
**BENEFITS**

## RISK MANAGEMENT AND SECURITY OF FUNDS

Our first step towards risk management is identification and assessment of the risks involved in our investment strategies, which in this case involves the following: loss of investment capital through mismanagement of funds, losses due to general market downtrend, losses due to cyber attacks and system failures. Upon successful identification and assessment we employ the following strategies:

-Avoidance: we avoid mismanagement of funds by employing skilled traders with a minimum of six years experience in the financial sector or at least three years in the stock exchange market. -Reduction: we reduce losses due to general market downtrend by investing in commodities like Gold to ensure consistent profit generation.

-Sharing: sharing losses between regular investors and stakeholders minimizes the total percentage loss per investor, this ensures that we maintain the minimum achievable profit for every investment plan.

-Retention: we also budget for cases of cyber attacks by mapping a significant percentage of the company's profit monthly for system maintenance and general security upgrade.

Risk Management and  
**FUNDS SECURITY**

## CONCLUSION

In conclusion, we intend to get to the top of the crypto investment market and maintain our position against all odds for as long as it's humanly possible. Our team of experts are constantly working towards the development of new and advanced trading strategy for consistent guaranteed profits.

### **FOREX**

Forex trading is the act of buying or selling currencies. Banks, central banks, corporations, institutional investors and individual traders exchange foreign currency for a variety of reasons, including balancing the markets, facilitating international trade and tourism, or making a profit.

### **CRYPTOCURRENCY**

With cryptocurrency being young, and the market being historically volatile, there is no yes or no answer about the wisdom of investing in cryptocurrency. It is with this in mind that we cover some pros and cons and friendly (but not professional) advice.

### **STOCKS**

Invest in commodity-related stocks. Buying stocks related to certain commodities is a way to bet on the value of a commodity without incurring all of the risk of futures trading. Commodity investments tend to attract more investor attention when inflation fears start to mount.
